- You have communicated your activity ideas to me and I am very open to them and can support you through it.
- You planned your activity for outside. We questioned if the weather was too cold to do an activity that mittens would need to be off. You went and checked the weather and changed the activity to inside. The children were curious and interested in the sticks and colourful tape. Many children participated and it was very popular. They used their fine motor finger muscles to wrap the tape around the stick. You noticed that some could wrap the tape tightly and some wrapped it loose. I am looking forward to the second part and so are the children.
